

Noteworth

Drive Successful HRSA-Funded Programs

HYPERTENSION MANAGEMENT

Noteworth supports the success of Health Resources and Services Administration (HRSA)-funded programs and initiatives with comprehensive and cost-effective solutions to boost engagement, drive proactive interventions, and improve outcomes.

Whether you are a fee-for-service or largely value-based care organization, leverage Remote Patient Monitoring (RPM) with Noteworth's platform to fuel care team efficiencies and deliver patient-focused, continuous monitoring for patients with uncontrolled hypertension.

Improve patient outcomes via:

- **Standardized workflows and care pathways**
- **Evidence-based, repeatable care plans**
- **EMR integrations & HIE connectivity**
- **Built-in alerts for non-adherence**
- **Extended caregiver access**
- **Tools to uncover social determinants of health (SDOH)**
- **Data-driven insights to drive proactive interventions**
- **Medicare documentation & reporting support**
- **Infinite configurations to scale immediate and long-term goals**

How it works:

1. Collect

Collect near real-time patient recordings with Bluetooth-enabled blood pressure cuffs for automatic data reporting. Noteworth provides end-to-end device kit management, handling everything from white-label services and logistics to onboarding and training for patients. Cellular devices & Interactive Voice Response (IVR) available on request.

2. Engage

Drive patient action with task-based reminders in the Noteworth Connect mobile app, personalized to each patient's unique care journey. Maximize adherence to plans with:

- Medication & symptoms management tools
- Activity tracking
- Patient-Reported Outcomes (PROs)

3. Educate

Deliver interactive hypertension-specific patient education materials infused with teach-back methods to ensure patients receive and understand the content.

4. Assess

Identify care gaps and foster collaboration with a holistic, centralized dashboard view of each patient for providers across the care continuum. Equip care teams with prioritized worklists to identify upcoming and resolve past due patient tasks. Drive proactive interventions with built-in alerts that notify care teams when patients are not adhering to care plans.

5. Act

Provide meaningful interventions and proactive touchpoints via:

- Convenient VIDEO VISITS accessible directly from a personalized app
- Asynchronous MESSAGING between patients and care team members
- GOALS & ACTION PLANS to activate and engage patients

6. Report

Automatically track encounters and log every patient interaction. Generate specialized reports for hypertension population subsets and deliver the analytics directly to payers.

Frequently Asked Questions

What type of RPM devices does Noteworth offer?

We offer over 400+ Bluetooth-enabled devices for remote physiological monitoring.

Can Noteworth support cellular devices?

Yes. We support cellular-enabled devices into our platform when needed.

How is data collected?

Noteworth offers automatic data collection and manual data entry.

Does Noteworth provide smart devices (such as smartphones or tablets) to comply with the RPM experience for low-income or rural populations?

If you have a patient population that needs hardware to comply with our experience, Noteworth partners with hardware vendors to provide refurbished and cost-effective devices in our kits.

Who owns the RPM devices supplied by Noteworth?

The client owns the devices.

Who handles the logistics and the training for the RPM devices?

The Noteworth team manages the shipping and logistics of the device kits purchased through Noteworth. Additionally, Noteworth's Support Team provides concierge onboarding and training for patients.

What is a "branded patient experience?"

Noteworth provides white-label services for patient mobile apps (iOS and Android) and RPM device kits. The patient app and device kits reflect the client's branding, logo, and images, providing patients with an experience unique to the client's brand identity.

Which disease conditions does Noteworth support?

Noteworth is a condition-agnostic platform. Our solution can be configured to support ambulatory care pathways for any disease condition and patient population. Some general conditions we support to-date include: hypertension, congestive heart failure, COPD, diabetes prevention and management, behavioral health, pediatric care, post-stroke recovery, high-risk obstetrics, post-discharge general surgery, and COVID-19.

About Noteworth

Noteworth is a digital healthcare SaaS pioneer dedicated to driving change and modernizing the way health systems and providers deliver and coordinate patient care. Noteworth's interoperable platform allows organizations to harness multiple streams of patient data into a centralized view to streamline care coordination between interdisciplinary teams and foster collaboration across stakeholders for greater visibility and accountability to establish alignment on care plans and organizational initiatives. Unlike disparate point solutions, our HIPAA-compliant platform enables care teams to leverage all domains of the virtual care spectrum, including care management, patient engagement, Remote Patient Monitoring (RPM), medication management, and telemedicine. This powerful combination of patient engagement and behavioral interventions with built-in alerts increases touchpoints and passes key information to clinical staff to facilitate proactive interventions, improve clinical outcomes, boost patient satisfaction, and decrease care costs. Noteworth is a privately held company headquartered in Jersey City, NJ. For more information, please visit www.noteworth.com.
